Mohan Raju TAMMU

# Introduction

Hi, I'm Mohan Raju Tammu, a passionate Web Developer and technology enthusiast. I specialize in creating responsive, user-friendly, and modern websites using the latest web technologies. I enjoy transforming ideas into functional digital experiences and continuously expanding my skills in web development, cybersecurity, and emerging technologies such as Generative AI. As a lifelong learner, I am committed to building innovative solutions and growing as a professional in the tech industry.

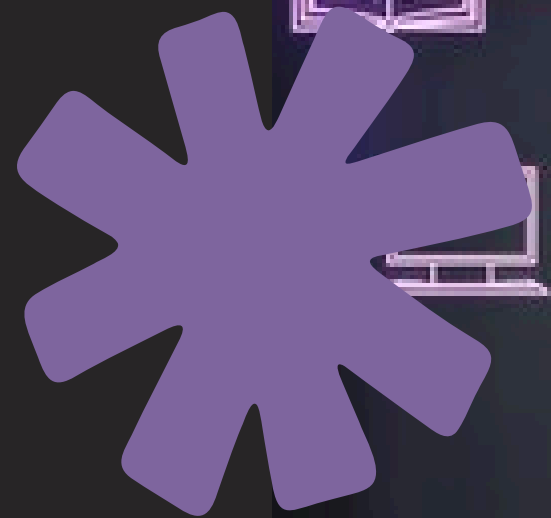

# Technical skills

- HTML5
- CSS3
- JavaScript
- Responsive Web Design
- Bootstrap
- React.js (if learning)
- Git & GitHub
- Website Deployment
- UI/UX Fundamentals

## TOOLS

- VISUAL STUDIO CODE ( VS CODE )
- CANVA
- FIGMA
- GITHUB

# Goals

My goal as a Web Developer is to create modern, responsive, and user-friendly websites that provide excellent user experiences. I aim to continuously improve my technical skills, stay updated with the latest web technologies, and develop innovative digital solutions that solve real-world problems. I am passionate about learning new technologies, including Cybersecurity and Generative AI, to expand my expertise and build secure, efficient, and impactful web applications. Through dedication, creativity, and continuous learning, I aspire to grow into a highly skilled technology professional and contribute to the advancement of the digital world.

# Project Overview

JPNCE COLLEGE ASSISTANT

Brief overview of the website purpose:

To support students & visitors with instant information.

The AI chatbot serves as a conversational guide for college related questions.

Focus on user-friendly interface + real-time response.

## Software Requirements

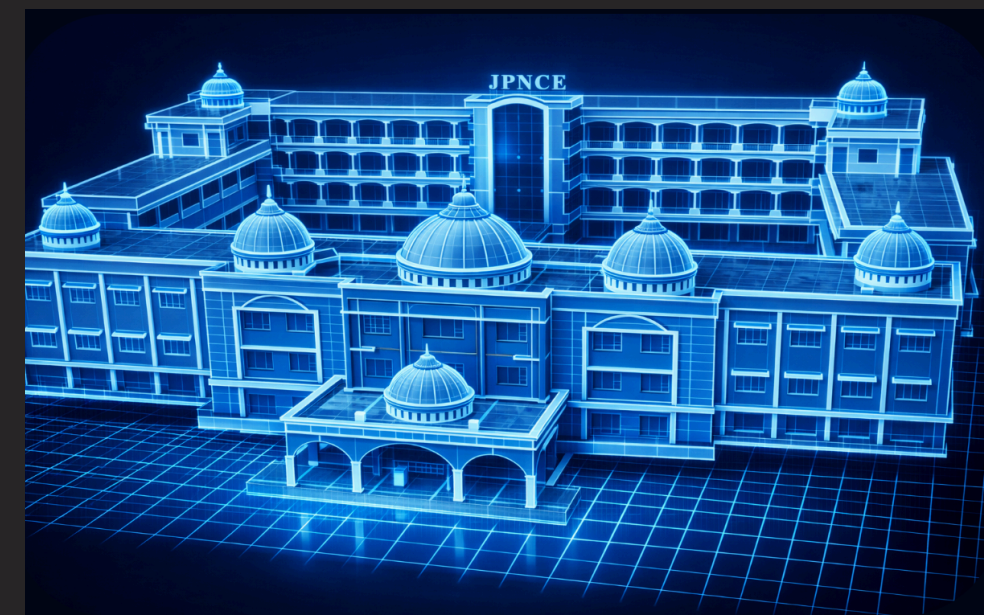

Frontend: HTML, CSS, JavaScript

Backend: Python (Flask or similar)

Chatbot Engine: AI/JS (e.g. backend or trained model) Used a default local device memory and processor as server
